HILLSDALE

AN INVITATION TO HILLSDALE

Those interested in Trees, Plants, and beautiful Gardens are always cordially welcome at Hillsdale. Here at our nursery, we maintain one of the largest and most beautiful rock gardens in Indiana, extensive ornamental shrubbery and evergreen plantings, and a spacious perennial and rose garden—all for the benefit of our friends and customers, and to help you get new ideas for making your own gardens more completely beautiful and satisfying.

We urge you to visit our nursery where trained horticulturists and members of our designing department will spare no effort to see that your garden needs are completely satisfied in the most efficient and economical manner.

LOCATION

The office and nurseries are one-quarter mile south of Castleton, on Nickel Plate Railroad. Five miles northeast of Indianapolis. To reach us by motor from Indianapolis, drive out on Noblesville road, which is now State Road 13, proceed to Allisonville; here you see our sign at the crossing, turn to the right (east) on 86th street to Castleton. Turn right (south) in Castleton to nurseries.

OUR LANDSCAPE DEPARTMENT

We maintain a thoroughly trained Landscape Organization whose members, after years of study and invaluable practical experience, have attained rare skill in the designing and planting of gardens, both large and small, of unusual beauty and merit. We want all of our customers to realize that we consider no job too small nor too large to command our best efforts and finest skill.

Without charge or obligation we will have one of our experts visit your grounds. He can then give you an estimate of the small charge for preparing your plan. This plan will include a list of the proper plants required to produce the effects you desire. Also, it is so prepared that you may complete the planting at one time, or spread it over a period of years. It will show the proper location of the house, drives, walks, pools, benches, pergolas, terraces and of every plant. *The value of such a plan must be apparent to everyone.*

A GREETING TO OUR PATRONS AND FRIENDS

We invite you to look through the pages of this booklet to see the many varieties of plants, trees and shrubs that we are able to offer you after seventeen years of constant growth and improvement. Each year has found us larger and more able to serve you than the year before.

We use only the best and most modern methods of cultivating and propagation and on our completely drained and thoroughly fertilized fields, obtain only very healthy and vigorous plants. Since our stock is all carefully dug, handled and packed and all precautions taken to have our varieties true to name, our patrons are assured of as near complete satisfaction as possible.

A telephone call, letter, or personal call at the nursery will assure you of prompt delivery of all plants which you desire.

With a most hearty good wish for unusual happiness and joy in your garden this year, we shall consider it a genuine pleasure to serve you.

Sincerely and cordially yours,

THE HILLSDALE LANDSCAPE CO.

JAPANESE CHERRIES

Only those who have visited Japan during the spring months, or others who have seen the famous planting along the Potomac in Washington, D. C., can realize the fairyland of beauty presented by hundreds of these Cherries in full flower. No words can do justice to such a sight—its splendor literally takes one’s breath away.

A rich, open soil and sunny position are, of course, desirable, but so long as the drainage is good and there is a sufficiency of moisture at the roots they will grow almost anywhere.

A Pool and Rockgarden at Mrs. Kin Hubbard's, 5437 North Meridian Street, Indianapolis
Hillsdale Landscape Department

A vintage black and white photograph of a Hillside Landscape Co. truck. The truck is a flatbed with a large, rounded, light-colored object (possibly a large pot or a piece of equipment) on the bed. The truck has a sign on the back that reads "THE HILLSDALE LANDSCAPE CO. LARGE TREE MOVING HU 8585". The truck is parked on a dirt road with bare trees in the background.

With our automotive mover, we can transplant mature trees twenty to thirty years old. The prices quoted include moving with large ball of earth, and are subject to deviation dependent upon condition at point of location.

ROSES

Throughout many centuries the Rose has been rightly regarded as the "Queen of Flowers." This feeling is entirely justified as, indeed, there is scarcely any other flowering plant which, in return for so little time, money and effort, can return such an abundance of beauty and rare charm over such a long season.

There is every indication that Roses have been cultivated and loved before and since the dawn of written history. We find written records showing that after the fall of Rome and during the dark ages in Europe, the early Christians cultivated Roses and introduced the flowers into their ceremonies; the rosary or string of prayers being first formed of the hips or seed pods of these plants in the seventh century.

In her book on "Old Time Gardens," Alice Morse Earle tells us how "The Persians gather before a single plant in flower; they spread their rugs, and pray before it; and sit and meditate before it; sip sherbet, play the lute and guitar in the moonlight; bring their friends and stand as in a vision, then talk in praises of it, and then all serenade it with an ode from Hafiz and depart." So it is that we would gather our friends around these exquisite Roses offered here; and like the Persians we would praise these Roses in sunlight and by moonlight, and sing their beauty in verses.

CULTURE—Due to lack of space, we cannot go into the details of Rose culture here, but upon request by telephone, by mail or in person, we shall be pleased to furnish our many customers and friends with detailed information and diagrams showing how to plant, prune, and care for Roses.

All of our Roses are strong, budded, two-year-old, field-grown plants. They are A No. 1 grade plants, the best grade available on the horticultural market today. Having been grown in the field until the planting season opens, the plants develop in a natural way and are superior to stock which has been developed into full growth under glass. After April 15, we shall have only Potted Roses for sale at our regular prices. All our Roses are potted in special Rose containers.

All Roses offered here have been tried and tested here at our nursery before offering them to our customers. We have found them of excellent quality and completely satisfactory in every way.

By this term is meant such plants as may be allowed to remain permanently in the open ground, whose foliage dies down to or near the ground each Autumn, coming forth again with renewed vigor the following Spring, giving a continuation of bloom from early Spring until frost. All our plants are field grown and are many times larger than seed bed plants.

We are constantly searching for and adding new and rare varieties of merit to our extensive collection.

DIRECTIONS FOR ORDERING

Write plainly and give explicit directions as to address and mode of shipment. Shipments will be forwarded exactly as directed but where without instructions we will use our best judgment. All our products shipped travel at the purchaser's risk. Any claims for damages should be made promptly to the transportation company's agent at the point of delivery. All goods are carefully packed.

We accept all orders on condition that they shall be void should injury befall them from frost, hail, fire, or other causes beyond our control.

TERMS

Prices in this list cancel all previous lists and quotations. Customers unknown to us will please send cash or references with orders. Accounts are due when bills are rendered and prompt payments are expected. Prices given in this list are F. O. B. Castleton, Indiana. Higher prices will be charged for specimens of higher quality selected by the customer or his representative.

Lots of 5, 50 and 500 trees or plants will be charged 10, 100 and 1,000 rates. These prices include packing costs, except on excessively bulky pieces, for which cost of packing will be extra.

GUARANTEE AND CLAIMS

All goods are guaranteed true to name, up to grade, full count, and in good condition when delivered. We use the greatest care to have all our trees and plants true to name and will replace any that prove untrue or refund purchase price. We shall not be liable for more than the purchase price.

OUR SPECIAL REPLACEMENT GUARANTEE

The plants selected by you represent the pick of our entire stock and are healthy, strong and vigorous when delivered and if properly taken care of are sure to thrive for you. Due to the fact that we have no control over the treatment they receive after they leave our nursery we make the following guarantee:

Any rose bush, plant, shrub, or tree, purchased at our regular retail price, that dies within the first growing season, will be replaced at our nursery at one-half the original price. Where it is necessary to deliver and plant the stock, the labor involved will be charged at cost. Plants are living organisms and their success depends upon the care you give them. Treat them well and do not hesitate to confer with us at any time regarding the care that should be given them. We want them to grow and thrive for you.

PLANTING

At a small additional charge per plant or tree we will plant upon your grounds any of the stock named in this list.

An extra charge is made for balling deciduous plants not marked B&B either in dormant season or when in full leaf for summer planting.

DELIVERY

We deliver free to Indianapolis and within a radius of ten miles from nurseries for all trees and plants bought at the nurseries amounting to \$10.00 or more.

Arrangements can be made for distance deliveries by motor truck.

Address all communications to The Hillsdale Landscape Co., R. R. 13, Box 158, Indianapolis, Indiana. Telephone Hu. 8585.
